

The Buzzer Project

We have lined up an IP based system that is not only modern and safe, but has the ability to upgrade seamlessly in the future. This will allow for secure communication that expands through multiple security layers and immediately enhances the security of the front entrance.

Below is the system we will be installing dependent on funds.

IP Based Video Door "Buzzer":

KIT Communications Technicians will Replace the existing LEM Series Aiphone devices with IX Series 7" Touch Screen Network Devices (Compatible with Future IP based solutions).

Peer-to-Peer IP Video Door Station (with SIP Capability for future proofing)

All Hardware to Surface Mount and Install the Door Station

SIP Compatible IP Video Mater Stations (7" Touchscreen)

SIP

SIP

Peer-to-peer

Backwards
Compatible

Qty (1) – IP Input/Output Network Adapter allowing door security control and the ability to add Mobile Compatibility in the future.
